

ABSTRACT

3

A universal mounting kit includes a support apparatus, a set of tie straps,
a set of mounting pads and a sheet of instructions directed to providing a user
6 with a step by step procedure for securing the support apparatus removably to
first and second tubular surfaces, where the first tubular surface is a desired
object such as a bicycle handlebar or gun barrel and where the second tubular
9 surface is another desired object such as a flashlight housing or laser pen
housing.
